

INSTRUCTIONS: This sheet is for your personal records and you are not required to include it in your operating record. This sheet is meant to serve as quick reference regarding staging regulations and assist you in tracking staging activities.

Staging Regulations:

327 IAC 15-15-10(c) Manure, litter, and process wastewater must be in an approved storage structure until removed for land application.

327 IAC 15-15-10(i)1 Manure and litter that are staged at the application site for more than seventy-two (72) hours must be covered or otherwise protected

and applied to the site within ninety (90) days.

327 IAC 15-15-10(i)2 Staging and solid manure or litter at the land application site is prohibited:

- (A) within three hundred (300) feet of surface waters of the state, drainage inlets, including water and sediment control basins, or water wells unless there is:
 - (i) a barrier; or
 - (ii) a surface gradient that contains or directs any contaminated run-off away from the waters of the state, drainage inlets, including water and sediment control basins, or water wells;
- (B) on any area with a slope greater than six percent (6%), unless run-on and run-off is controlled; or
- (C) on any standing water or waterway.
